

Aero App for iOS ReadMe

General Information

1. Description

Aero App, the NGA Aeronautical Application, provides flight crews with the ability to view Flight Information Publications (FLIP), FAA sectionals, Enroute charts, as well as new digital-only products such as Airfield Qualification Program (AQP), Giant Reports, and textual and graphical weather.

Data encryption and validation are ensured throughout Aero App.

2. Application Version: Aero App iOS Version 1.2506

3. Replaces: Aero App iOS Version 1.2502

4. Version Highlights:

Enhancement

- **Talon Point:** Aero App marks Talon Point locations on the Map. Pilots can download Drop Zone and Load Zone surveys directly to Aero App and view them as PDFs.
- **DD 175-1 Briefings:** Pilots can download and view DD 175-1 briefings directly to Aero App.
- **User Profiles:** Pilots can create user profiles to save their data download preferences and switch between different profiles to easily download the latest data for each mission.

Bug Fixes

- Various bug fixes and performance improvements.

5. System Requirements:

- iPad running iOS 17 or later
- iPad with Apple A12X processor or later
- 16 GB of available storage minimum (for the installation of Aero App and one complete data cycle)
