

Aero App for Android ReadMe

General Information

Aero App, the NGA Aeronautical Application, provides flight crews with the ability to view Flight Information Publications (FLIP), FAA sectionals, Enroute charts, as well as new digital-only products such as Airfield Qualification Program (AQP), Giant Reports, and textual and graphical weather.

Data encryption and validation are ensured throughout Aero App.

1. **Application Version:** Aero App Android Version 1.2606

2. **Replaces:** Aero App Android Version 1.2602

3. **Version Highlights:**

Features

- **Data API:** The Data API contains additional aviation datasets, including airport and navigation data, airspace and boundary information, air traffic control regions, military operational areas, special activity zones, and operational reports.
- **Add IAP to Route:** Pilots can add an Instrument Approach Procedure (IAP) to their active route. Users can select a runway-specific approach and its initial approach fix to define the procedure's entry point.

Bug Fixes

- Various bug fixes and performance improvements.

4. **System Requirements:**

- Android 13 or later
- 16 GB of available storage minimum (for the installation of Aero App and one complete data cycle)
