How to Install the Beta Version of Aero App

Aero App · https://www.aeroapp.info/kb/docs/aeroapp/install-beta/

Prerequisites

1. Received an email from TestFlight with the following subject: *National Geospatial-Intelligence Agency has invited you to test Aero App.*
2. Have the TestFlight app installed on your device.
   - If you do not have the TestFlight app installed, search the app store and install TestFlight.
3. Have the email app (Outlook, Gmail, etc.) installed on your device.

Installation

Step 1:

Open the email from TestFlight and select the "View in TestFlight" link which takes you to the TestFlight app or redeem the code if you've received one.

App Description

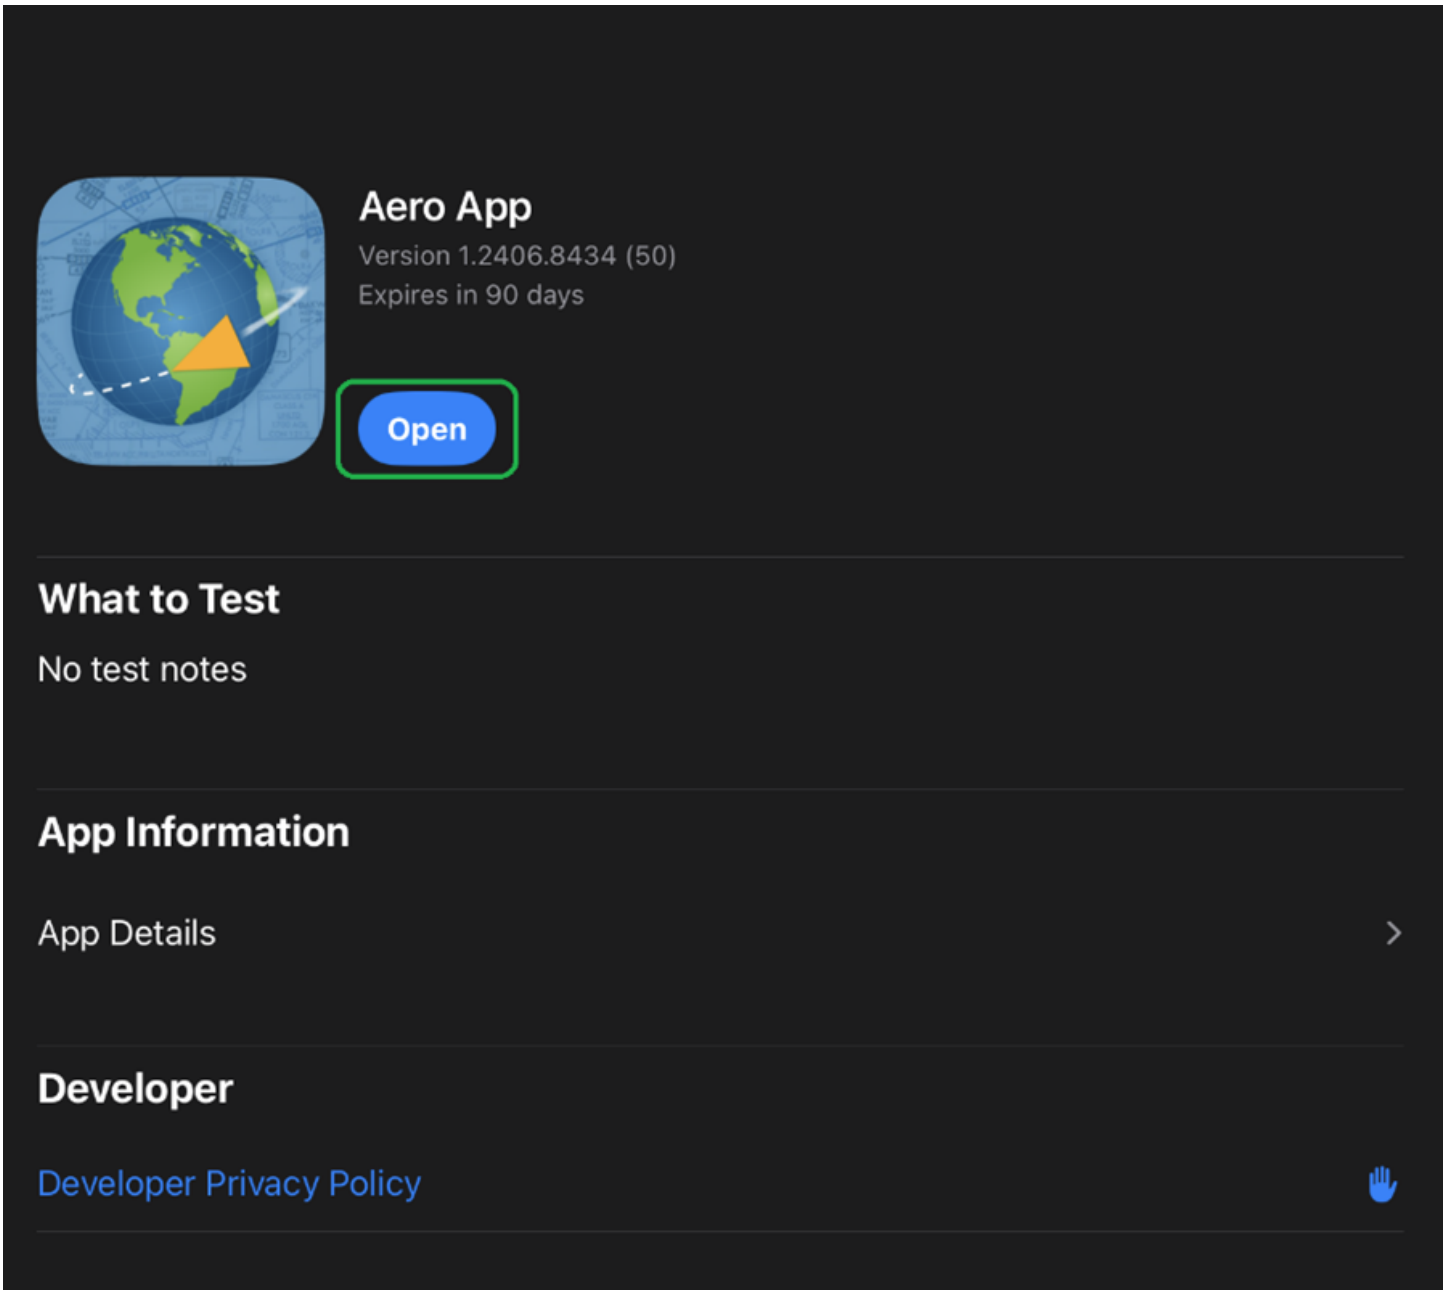

Step 2:

You can now install the beta version of Aero App through TestFlight. Tap the "Install" button.

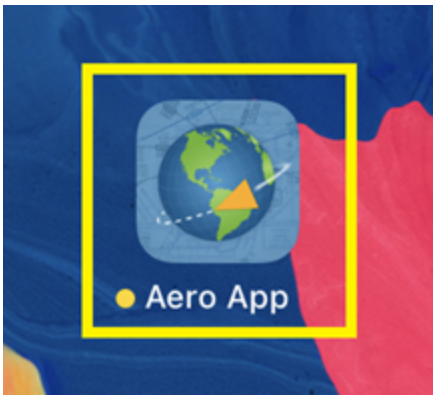

Step 3:

Once the installation is complete, an open button will display. Tap the "Open" button.

Step 4:

The beta version of Aero App is now installed on your device and ready to be used.

Sending Feedback

Aero App beta feedback can be sent through the TestFlight app to Apple Store Connect website [App Store Connect (apple.com)]. Testers have the option to include screenshots when submitting their feedback.
