

Aero App for iOS ReadMe

General Information

1. Description

Aero App, the NGA Aeronautical Application, provides flight crews the ability to view Flight Information Publications (FLIP), FAA sectionals, Enroute charts, as well as new digital-only products such as Airfield Qualification Program (AQP), Giant Reports, and textual and graphical weather.

Data encryption and validation is ensured throughout Aero App.

2. Application Version: Aero App iOS Version 1.2306

3. Replaces: Aero App iOS Version 1.2301

4. Version Highlights:

Features

- **Coverage and Line of Sight Orbit Altitudes:** Aero App has enhanced the existing Orbit feature to provide Coverage and Line of Sight configurations. Coverage and Line of Sight altitudes inform pilots of the highest altitude for mountainous terrain and vertical obstructions.
- **Multitasking:** Aero App supports multitasking capabilities which allow pilots to interact with different apps simultaneously in Split View configuration. Pilots can easily complete tasks and switch between apps without interruption.

Enhancements

- **Moving Map Enhancement:** Aero App has enhanced the Moving Map for improved performance and user experience.

Bug Fixes

- Various bug fixes and performance improvements.

5. System requirements:

- iOS 15.0 or higher
- 16 GB of available storage minimum (for the installation of Aero App and one complete data cycle)
